Modifications after Phase 1:

- We changed this from disjoint NORMAL_DAY and HOLIDAY. Deleted NORMAL DAY. Made HOLIDAY a completely separate entity with Name and Date keys. We might revisit this again.
- Removed PURCHASE_DAY entity and the connecting HAS_A and CONTAINS relations. Replaced it with a TRACKS_SOLD relation connecting STORE and PRODUCT.
- Renamed Status as Employment_Status. Remove the disjointness.
- Added abbreviations on STATE (State_abbreviations).
